## R-Value

**RC16** Thickness = 1 3/4" R value = 16.04

**CC16** Thickness = 1 3/4" R value = 16.04

**Flush** Thickness = 1 3/4" R value = 16.04

Steel-Craft's ClimaCore advantage means that we inject polyurethane insulation directly between the two exterior panels. This CFC and HCFC-free foam gives you better energy efficiency and greater strength.

## The Elite Series in Charcoal

Our Elite Series in Charcoal will add sophistication to any home with a distinctive matte charcoal colour. The low gloss, textured surface will keep the colour beautiful at any angle and unlike other doors in dark colours, the Charcoal door will not warp or distort when exposed to the heat or sun.

NOTE: Colour representations may not be accurate. Exact colour matches can be requested from a Steel-Craft dealer.

## Solar Reflective Coating

Our special coating systems reflect the sun's rays rather than absorbing them to avoid extensive heat build-up. As a result, the temperature reached on the steel surface is significantly reduced. This organic coating technology increases the lifetime of the door, and is backed by Steel-Craft's industry leading warranty.

SURFACE TEMPERATURE (CELSIUS)		
	LOW WIND (0-2ms-1)	MEDIUM WIND (2 to 6 ms-1)
<b>CHARCOAL</b>	<b>113.3</b>	<b>64.9</b>
STANDARD BLACK	128.4	71.8
STANDARD BROWN	124.6	68.4

## Premium quality in every layer

We use only the best components for a finished product that delivers unmatched quality and durability:

- Finest quality Canadian galvanized steel
- Polyester paint topcoats to protect the underlying zinc coating
- Thermal-Break separates steel skins to reduce cold/heat conductivity, and stops frost and moisture from collecting on the inside of the door

## Unnecessary Lifetime Warranty

Sure, we have a lifetime warranty. But, after thousands of tests performed on all of our parts, we don't think you'll ever need it. In fact, only 0.01% of our customers ever do. See dealer for complete details

## Hardware

We design and manufacture all hardware components to ensure:

- Optimum strength, durability and smooth operation
- Highest gauge and strongest steel amongst the market
- Top quality nylon rollers for long life and quiet operation
- Computer balanced oil tempered torsion springs, steel bearings and die cast cable drums increase ease of operation
- Corrosion resistant galvanizing is used on all steel parts to reduce the possibility of rusting

## Virtually Maintenance Free

Finished with a factory applied, baked-on, two-coat exterior polyester paint finish on both sides gives years of maintenance-free operation. The seamless steel inside brightens the interior of the garage and is easy to keep clean.
